

Fair Orchids

Vandaceous - species

06-2016 **Subj to prior sale**

Please email or call to place an order.

	← <i>Amesiella philippinense</i> This compact little species produces a proportionately very large, full, white flower. NBS/BS \$30	
	<i>Angraecum didieri</i> → This African species is very compact, and produces a proportionately large, white, star shaped flower. BS in 3" net pot \$25	
	← <i>Angraecum eichlerianum</i> This species has a more vine like stature. Seedling in 3" net pot, NBS? \$24	
	<i>Ascocentrum ampullaceum (V ampullacea)</i> → This is the orange color form discovered in China. BS seedlings in 3" net pot. \$20	
	← <i>Ascocentrum miniatum (V miniata)</i> The bright yellow miniature. BS seedlings in 3" net pot. \$20	
	<i>Doritis pulcherrima ('Red Hot' x self)</i> → Technically a Phalaenopsis now. This species sends spikes straight up, and readily forms clumps. BS seedlings in 3.1/2" net pot. \$24	
	← <i>Hologlossum flavescens</i> A true miniature (<2" plant), with very large flowers (3/4"). Mounted \$32	
	<i>Holcoglossum wangii</i> → This is one of the larger Holcoglossums. It produces spikes with 10-15 blooms, which open simultaneously. \$36	
	← <i>Phalaenopsis bellina, var alba</i> This variety has white and green flowers. BS seedlings in 2" pot \$25	
	<i>Phalaenopsis deliciosa</i> → Another small species, with somewhat thinner leaves. Blooms randomly during the year, slightly fragrant flowers. BS seedlings in 2" pot \$25	
	← <i>Renanthera citrina</i> Blooming size seedlings in 3.12" net pot \$32	
	<i>Renanthera histrionica</i> → I have not bloomed these yet, but believe that the plants are BS. Mounted. \$36	
	← <i>Renanthera imschootiana</i> BS plants in 5" pot (hanging). \$40	
	<i>Vanda tricolor</i> → Young seedlings in 3" net pot. These will need 4-5 years to reach BS. \$12	
	← <i>Vanda denisoniana</i> The yellow Vanda used extensively in breeding, in part due to flower fragrance. Young plant in 3.1/2" net pot, probably 3-4 years from BS. \$20	
	<i>Vanda sanderiana, alba</i> → Very large seedlings, which still need about 2 years to reach BS \$60
